Subject: [External] Atlantic Coast Pipeline

CAUTION: External email. Do not click links or open attachments unless verified. Send all suspicious email as an attachment to report.spam@nc.gov.

I'm writing to voice my opposition to the proposed Atlantic Coast Pipeline. Piping fracked gas through NC for the benefit of Duke Power and to the detriment of everybody else seems wrong-headed to me. It will not contribute to the economy as Duke Power claims. Very few long term jobs will result. What will result will be private land lost to the pipeline, the potent greenhouse gas, methane leaked from the pipeline and from fracking operations, and a chance to be leaders in the field of alternative energy production. The advocacy group, NC-WARN has developed a plan that would allow NC to wean ourselves off fossil fueled power plants by 2030. Duke Power should look to adopt this or some similar strategy. This would have them putting more effort into solar and wind energy, building an energy infrastructure for the 21st century, instead of continuing to build an infrastructure for the 20th century.

I urge you to oppose the construction of this pipeline.

e
